Vanta Web — Accessibility Conformance Report

(Based on VPAT® Version 2.5Rev)

Name of Product/Version: Vanta Web

Report Date: October 2026

Product Description: [ENTER A BRIEF DESCRIPTION OF THE PRODUCT]

Contact Information: [ENTER CONTACT EMAIL OR NAME]

Notes: None

Evaluation Methods Used: Automated accessibility evaluation using axe-core 4.14.0, IBM Equal Access 4.0.34, HTML CodeSniffer 2.5.1, and programmatic keyboard simulation. This report covers the approximately 50–55% of WCAG 2.2 Level A and AA success criteria that are testable by automated tools. Manual testing is required for full conformance coverage.

Prepared by: Inna

Report Date: October 14, 2026

Applicable Standards/Guidelines

This report covers the degree of conformance for the following accessibility standards/guidelines:

Standard/Guideline	Included in Report
Web Content Accessibility Guidelines 2.2	Level A (Yes) Level AA (Yes) Level AAA (No)

Terms

The terms used in the Conformance Level information are defined as follows:

- **Supports:** The functionality of the product has at least one method that meets the criterion without known defects or meets with equivalent facilitation.
- **Partially Supports:** Some functionality of the product does not meet the criterion.
- **Does Not Support:** The majority of product functionality does not meet the criterion.
- **Not Applicable:** The criterion is not relevant to the product.
- **Not Evaluated:** The product has not been evaluated against the criterion. This can be used only in WCAG Level AAA.

Note on this draft: 27 Level A and AA criteria that automated tools cannot test are marked Not Evaluated here. They must be evaluated manually and given one of the other levels before this report is final.

WCAG 2.2 Report

Table 1: Success Criteria, Level A

Criteria	Conformance Level	Remarks and Explanations
1.1.1 Non-text Content (Level A)	Does Not Support	The majority of non-text content (images, icons and image buttons) in the product lacks text alternatives. Screen reader users cannot perceive the information or function conveyed by these elements. 13 instances were detected: A non-decorative SVG element must have an accessible name (13 instances). Pages affected (1 of 2 scanned): Startup Page (13). Detected by: IBM Equal Access.
1.2.1 Audio-only and Video-only (Prerecorded) (Level A)	Not Evaluated	This criterion has not been evaluated.
1.2.2 Captions (Prerecorded) (Level A)	Supports	The product provides captions for prerecorded video that has audio.
1.2.3 Audio Description or Media Alternative (Prerecorded) (Level A)	Not Evaluated	This criterion has not been evaluated.
1.3.1 Info and Relationships (Level A)	Does Not Support	The majority of structural content (headings, lists, tables and form fields) in the product is not marked up so that its relationships can be determined programmatically. Screen reader users do not get the structure that sighted users see. 143 instances were detected: Fieldset does not contain a legend element. All fieldsets should contain a legend element that describes a description of the field group (73 instances); Groups with nested inputs must have unique accessible name (65 instances); Certain ARIA roles must be contained by particular parents (4 instances); The 'for' attribute for a label should reference a non-empty, unique 'id' attribute of a valid element (1 instance). Pages affected (2 of 2 scanned): Vanta Landing Page (70) and Startup Page (73). Detected by: IBM Equal Access, HTML CodeSniffer, axe-core. 47 elements could not be determined automatically and require manual review.
1.3.2 Meaningful Sequence (Level A)	Supports	The product presents content in an order that can be determined programmatically.
1.3.3 Sensory Characteristics (Level A)	Not Evaluated	This criterion has not been evaluated.
1.4.1 Use of Color (Level A)	Supports	The product does not rely on color alone to convey information.
1.4.2 Audio Control (Level A)	Supports	The product does not include audio that plays automatically for more than 3 seconds without a way to stop it.

Criteria	Conformance Level	Remarks and Explanations
2.1.1 Keyboard (Level A)	Supports	The product can be operated with a keyboard. 1 element could not be determined automatically and requires manual review.
2.1.2 No Keyboard Trap (Level A)	Supports	The product lets keyboard focus move freely into and out of every component.
2.1.4 Character Key Shortcuts (Level A)	Not Evaluated	This criterion has not been evaluated.
2.2.1 Timing Adjustable (Level A)	Supports	The product does not impose time limits that users cannot adjust.
2.2.2 Pause, Stop, Hide (Level A)	Supports	The product does not include moving, blinking or scrolling content that users cannot pause.
2.3.1 Three Flashes or Below Threshold (Level A)	Not Evaluated	This criterion has not been evaluated.
2.4.1 Bypass Blocks (Level A)	Does Not Support	The majority of pages in the product provide no mechanism, such as a skip link, to bypass repeated blocks of content. Keyboard and screen reader users must move through the same repeated content before reaching the main content. 8 instances were detected: No skip link was found to let keyboard users bypass repeated content; Iframe element requires a non-empty title attribute that identifies the frame (6 instances). Pages affected (2 of 2 scanned): Vanta Landing Page (4) and Startup Page (4). Detected by: HTML CodeSniffer, Keyboard simulation. 2 elements could not be determined automatically and require manual review.
2.4.2 Page Titled (Level A)	Supports	The product gives each page a title that describes its topic or purpose.
2.4.3 Focus Order (Level A)	Not Evaluated	This criterion has not been evaluated. Focus order logged. Manual review required to confirm logical sequence.
2.4.4 Link Purpose (In Context) (Level A)	Supports	The product ensures that the purpose of links can be determined from the link text alone or in combination with the surrounding context.
2.5.1 Pointer Gestures (Level A)	Not Evaluated	This criterion has not been evaluated.
2.5.2 Pointer Cancellation (Level A)	Not Evaluated	This criterion has not been evaluated.
2.5.3 Label in Name (Level A)	Supports	The product includes the visible label text in the accessible name of its controls. 6 elements could not be determined automatically and require manual review.
2.5.4 Motion Actuation (Level A)	Not Evaluated	This criterion has not been evaluated.
3.1.1 Language of Page (Level A)	Supports	The product identifies the default language of each page programmatically.
3.2.1 On Focus (Level A)	Not Evaluated	This criterion has not been evaluated.
3.2.2 On Input (Level A)	Supports	The product meets 3.2.2 On Input.

Criteria	Conformance Level	Remarks and Explanations
3.2.6 Consistent Help (Level A)	Not Evaluated	This criterion has not been evaluated.
3.3.1 Error Identification (Level A)	Supports	The product meets 3.3.1 Error Identification.
3.3.2 Labels or Instructions (Level A)	Does Not Support	The majority of form fields in the product have no label or instructions. Users do not know what information to enter. 65 instances were detected: Groups with nested inputs must have unique accessible name (65 instances). Pages affected (1 of 2 scanned): Vanta Landing Page (65). Detected by: IBM Equal Access. 6 elements could not be determined automatically and require manual review.
3.3.7 Redundant Entry (Level A)	Not Evaluated	This criterion has not been evaluated.
4.1.2 Name, Role, Value (Level A)	Does Not Support	The majority of user interface components in the product do not expose a name, role or value to assistive technology. Assistive technology users cannot identify or operate these components. 150 instances were detected: This fieldset element does not have a name available to an accessibility API. Valid names are: legend element, aria-label undefined, aria-labelledby undefined (138 instances); Required ARIA attributes must be provided (7 instances); A <label> element must have non-empty descriptive text that identifies the purpose of the interactive component (5 instances). Pages affected (2 of 2 scanned): Vanta Landing Page (81) and Startup Page (69). Detected by: axe-core, IBM Equal Access, HTML CodeSniffer. 9 elements could not be determined automatically and require manual review.

Table 2: Success Criteria, Level AA

Criteria	Conformance Level	Remarks and Explanations
1.2.4 Captions (Live) (Level AA)	Not Evaluated	This criterion has not been evaluated.
1.2.5 Audio Description (Prerecorded) (Level AA)	Not Evaluated	This criterion has not been evaluated.
1.3.4 Orientation (Level AA)	Supports	The product works in both portrait and landscape orientation.
1.3.5 Identify Input Purpose (Level AA)	Supports	The product identifies the purpose of form fields that collect personal information.

Criteria	Conformance Level	Remarks and Explanations
1.4.3 Contrast (Minimum) (Level AA)	Does Not Support	The majority of text in the product does not have sufficient contrast against its background. Users with low vision have difficulty reading this text. 10 instances were detected: Elements must meet minimum color contrast ratio thresholds (7 instances); This element has insufficient contrast at this conformance level. Expected a contrast ratio of at least 3:1, but text in this element has a contrast ratio of 2.19:1. Recommendatio… (2 instances); This element has insufficient contrast at this conformance level. Expected a contrast ratio of at least 4.5:1, but text in this element has a contrast ratio of 2.51:1. Recommendat… (1 instance). Pages affected (2 of 2 scanned): Vanta Landing Page (1) and Startup Page (9). Detected by: axe-core, HTML CodeSniffer. 34 elements could not be determined automatically and require manual review.
1.4.4 Resize Text (Level AA)	Supports	The product allows text to be resized up to 200% without loss of content or functionality.
1.4.5 Images of Text (Level AA)	Not Evaluated	This criterion has not been evaluated.
1.4.10 Reflow (Level AA)	Not Evaluated	This criterion has not been evaluated.
1.4.11 Non-text Contrast (Level AA)	Not Evaluated	This criterion has not been evaluated.
1.4.12 Text Spacing (Level AA)	Supports	The product remains readable when users adjust text spacing.
1.4.13 Content on Hover or Focus (Level AA)	Not Evaluated	This criterion has not been evaluated.
2.4.5 Multiple Ways (Level AA)	Not Evaluated	This criterion has not been evaluated.
2.4.6 Headings and Labels (Level AA)	Not Evaluated	This criterion has not been evaluated.
2.4.7 Focus Visible (Level AA)	Does Not Support	The majority of focusable elements in the product show no visible focus indicator. Keyboard users cannot tell which element is active. 22 instances were detected: 22 focusable elements show no visible focus indicator. Pages affected (2 of 2 scanned): Vanta Landing Page (18) and Startup Page (4). Detected by: Keyboard simulation. 8 elements could not be determined automatically and require manual review.
2.4.11 Focus Not Obscured (Minimum) (Level AA)	Partially Supports	In most instances, the product keeps the element that has keyboard focus at least partly visible. Exceptions include: • 3 focusable elements are completely covered by other content when focused. Keyboard users cannot see what is focused. Pages affected (1 of 2 scanned): Vanta Landing Page (3). 3 instances were detected. Detected by: Keyboard simulation. 38 elements could not be determined automatically and require manual review.
2.5.7 Dragging Movements (Level AA)	Not Evaluated	This criterion has not been evaluated.

Criteria	Conformance Level	Remarks and Explanations
2.5.8 Target Size (Minimum) (Level AA)	Supports	The product provides pointer targets that are at least 24 by 24 CSS pixels or sufficiently spaced.
3.1.2 Language of Parts (Level AA)	Supports	The product identifies passages in a different language programmatically.
3.2.3 Consistent Navigation (Level AA)	Not Evaluated	This criterion has not been evaluated.
3.2.4 Consistent Identification (Level AA)	Not Evaluated	This criterion has not been evaluated.
3.3.3 Error Suggestion (Level AA)	Not Evaluated	This criterion has not been evaluated.
3.3.4 Error Prevention (Legal, Financial, Data) (Level AA)	Not Evaluated	This criterion has not been evaluated.
3.3.8 Accessible Authentication (Minimum) (Level AA)	Not Evaluated	This criterion has not been evaluated.
4.1.3 Status Messages (Level AA)	Not Evaluated	This criterion has not been evaluated.

Legal Disclaimer

This report reflects the state of the product at the time of testing. Results may change as the product is updated.

The findings come from automated tools, which can detect only a subset of WCAG success criteria failures. A result of "Supports" means no failure was detected by the tools listed, not that conformance has been verified. Criteria outside automated scope are marked "Not Evaluated" and require review by a qualified accessibility professional.

This document is a draft accessibility conformance report. It is not a legal certification of compliance with any law, regulation or standard.

"Voluntary Product Accessibility Template" and "VPAT" are registered service marks of the Information Technology Industry Council (ITI).

Testing environment: Chrome 152 on Windows

Testing period: October 14, 2026

Standard: WCAG 2.2 Level A and AA · VPAT® 2.5Rev

Testing type: Automated scan only

Out of scope

This report reflects automated testing conducted using axe-core 4.14.0, IBM Equal Access 4.0.34, HTML CodeSniffer 2.5.1, and programmatic keyboard simulation on October 14, 2026. The following criteria require additional manual evaluation and are marked Not Evaluated: screen reader compatibility (JAWS, NVDA), cognitive accessibility, focus order logical sequence, and all criteria outside automated detection scope. Manual testing results will be added separately.

Methodology

Automated testing using four scanning layers: axe-core 4.14.0, IBM Equal Access 4.0.34, HTML CodeSniffer 2.5.1, and programmatic keyboard simulation. Automated testing covers approximately 50–55% of WCAG 2.2 Level A and AA success criteria. Coverage varies by page complexity.

2 page(s) were tested, October 14, 2026.

Rule engines (2 page(s)): each engine is run against the live page and its failures are mapped to WCAG success criteria using the engine's own mapping (axe-core rule tags, the IBM Equal Access WCAG 2.2 policy, and HTML CodeSniffer WCAG 2.1 AA message codes). Only definite failures are counted; items an engine flags as needing review are reported separately. When more than one engine reports the same element against the same criterion, it is counted once.

Keyboard scan (2 page(s)): the sequential focus order is computed from the page, focus is moved to each stop in turn, and Tab and Shift+Tab key events are dispatched at each stop. The scan records each stop's element type, role and label, compares styles with and without focus to detect a visible focus indicator, checks whether the focused element is hidden behind fixed or sticky content, looks for key handlers that keep focus from leaving a component, lists interactive elements that are not Tab stops, and checks for a skip link. Browsers do not act on scripted key presses, so this is a simulation and does not replace testing with a physical keyboard.

Conformance levels are assigned per criterion from the number of violation instances found across the pages where a scan covering that criterion ran. An instance is one failing element, counted once however many engines reported it: no

instances = Supports; 1 to 4 = Partially Supports; 5 or more = Does Not Support; any failure of 2.4.1 Bypass Blocks = Does Not Support. Criteria with no automated check are marked Not Evaluated. Not Applicable is assigned only where the consultant explicitly determined the criterion does not apply. A consultant may also rate a criterion Does Not Support directly; those rows begin "Consultant determination".

Page	Rule engines	Keyboard scan
Vanta Landing Page	axe-core 4.14.0, IBM Equal Access 4.0.34, HTML CodeSniffer 2.5.1; Oct 14, 2026, 12:06 PM	Oct 14, 2026, 12:06 PM: 32 focus stop(s)
Startup Page	axe-core 4.14.0, IBM Equal Access 4.0.34, HTML CodeSniffer 2.5.1; Oct 14, 2026, 12:07 PM	Oct 14, 2026, 12:07 PM: 115 focus stop(s)

Criteria by conformance level

Conformance Level	Criteria
Supports	20
Partially Supports	1
Does Not Support	7
Not Evaluated	27

Appendix B: Page Details

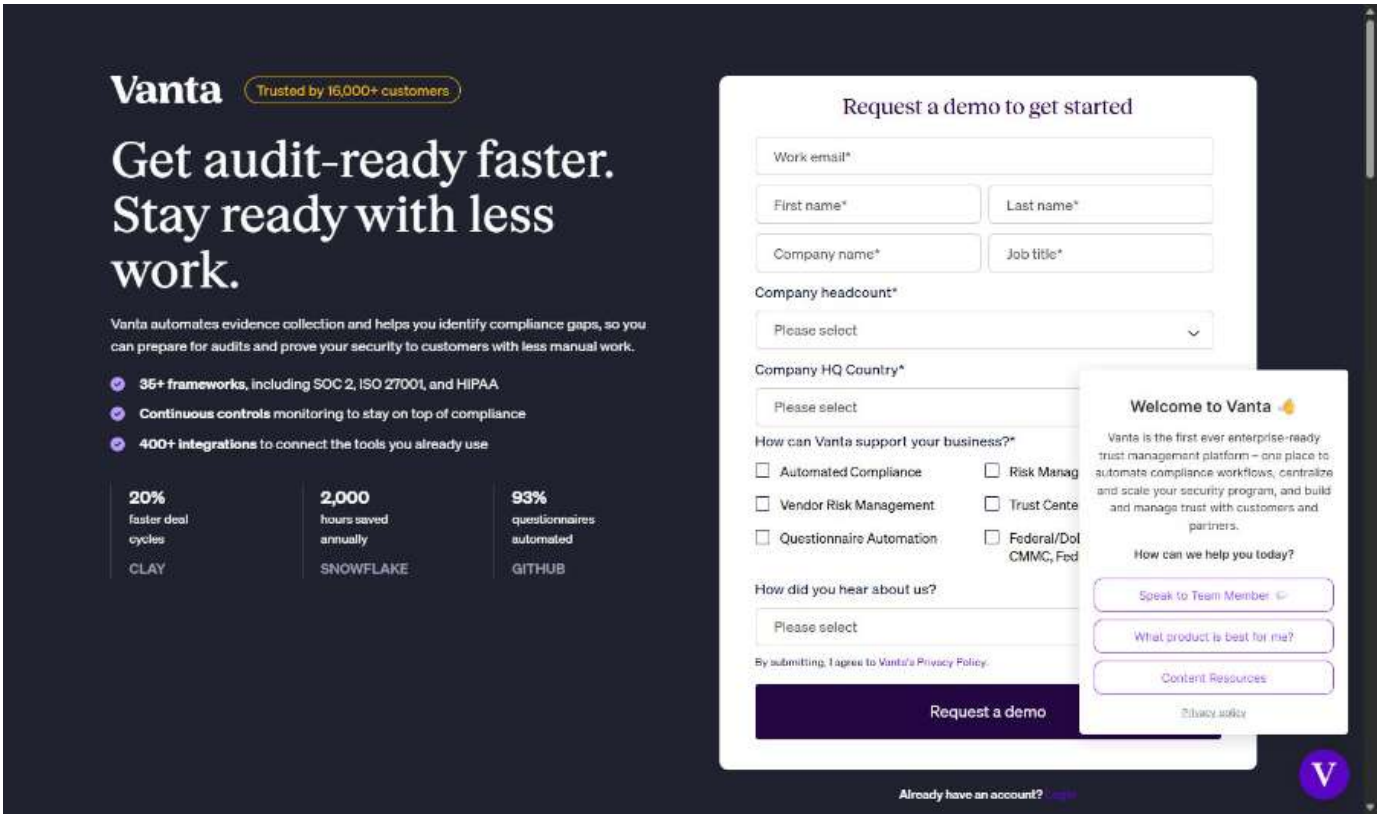

For each scanned page: every violation detected, and the sequential focus order recorded by the keyboard scan for consultant review of WCAG 2.4.3 Focus Order.
